Artificial Intelligence and Machine Learning

Expand your skills and knowledge base

Are you a developer or engineer specializing in artificial intelligence (AI) and machine learning (ML) looking to refresh or develop your skills or knowledge base? Then check out some of the great resources that Skillsoft-Percipio has to offer!

LEARNING CHANNEL
ARTIFICIAL INTELLIGENCE

11 RESOURCES

Comprehensive learning channel with resources from beginner to intermediate on all facets of artificial intelligence and machine learning.

LEARNING CHANNEL
LEADERSHIP IN THE AGE OF AI

DURATION: 1 HOUR

Artificial intelligence has forever changed the way that businesses operate. Leaders who embrace AI and other digital transformation technologies can help increase success within their organization.

ASPIRE JOURNEY
AI APPRENTICE TO AI ARCHITECT

DURATION: 28 HOURS

The popularity of Artificial Intelligence (AI) is growing at a very fast pace. Industries are implementing AI as it can replicate human actions but do it faster and more accurately. This Journey will teach you the skills required to go from an AI Apprentice to AI Architect.

ASPIRE JOURNEY
ML PROGRAMMER TO ML ARCHITECT

DURATION: 71 HOURS

Machine Learning Architects interpret real-time analysis of data to automate and increase efficiency across all business domains, setting the stage for meaningful AI that moves from reactive to predictive. This Skillsoft Aspire journey will guide you in the transition from becoming a DL Programmer to a ML/DL Architect Master through mechanisms such as computational theory.

EBOOK
ARTIFICIAL INTELLIGENCE IN THE 21ST CENTURY

DURATION: 15 HOURS

Without people there is no AI. Hence, we have decided that it is important to 'showcase' the people who have made AI successful through the human-interest boxes which are sprinkled throughout the text. From people come the ideas and the development of the methods that we present over the fifteen chapters of this book.
